Lukáš Gajdoš

Service & Project Manager · IT Analyst · Delivery Specialist

About Me

Hybrid IT professional with 7+ years of cross-domain experience spanning network infrastructure, IT recruitment, and SaaS/IoT product delivery. Currently managing the full lifecycle of a mission-critical M2M/IoT platform used by leading European telco operators — from business analysis and release planning through hands-on testing and production monitoring.

Expert at bridging the gap between technical teams and international business stakeholders. Available for new opportunities.

Experience

Service & Project Manager — M2M / IoT

Sep 2024 – Present

Comverga a.s. · Full Remote · Telco / SaaS

- Owns end-to-end delivery lifecycle for a web SaaS SIM card management platform serving leading European telco operators.
- Translates complex international business requirements into detailed technical specifications, UML process diagrams, and actionable user stories.
- Leads release planning and cross-team coordination in an Agile/Scrum environment, ensuring on-time quality delivery.
- Executes comprehensive QA coverage: E2E, regression, system, UAT, API (Postman/SoapUI) and GUI testing across each release cycle.
- Monitors and investigates production incidents using Grafana Loki log analysis and Nagios alerting.
- Writes SQL queries (MySQL/HeidiSQL) to analyse large datasets, diagnose issues, and build Grafana dashboards.

IT Recruitment Consultant

Oct 2022 – Jun 2024

CPL (formerly Covalen) · Brno

- Managed full-cycle IT recruitment across software engineering, DevOps, data, and PM roles.
- Built and maintained a pipeline of candidates and client relationships, combining business development with technical hiring advisory.
- Leveraged knowledge of tech stacks and IT processes to consult hiring managers on realistic role scoping and talent strategy.

Technical Support Specialist — Level 2

Feb 2018 – Oct 2022

Miracle Network / CBL · Brno · Telco

- Provided L2 support for B2B data network infrastructure — complex diagnostics, remote troubleshooting, and coordinating on-site technician deployments.
- Maintained and monitored IoT/M2M connectivity and hardware (Mikrotik, Racom, Orcave, Summit) with daily use of Grafana, SNMP and SFTP tools.
- Operated in an on-call 24/7 model, managing SLA obligations and inter-provider telco communication.
- Administered Windows environments; used PowerShell scripting; worked with TCP/IP, DNS, DHCP and SNMP protocols.
